To whom it may concern,

I am the engineer at the Cumberland County Improvement Authority (CCIA). I am writing this letter to recommend the services provide by Copperhead Customs Inc. The CCIA has recently utilized Copperhead Customs Inc. to provide camera inspection and cleaning of debris/blockages from our Landfill Gas Collection System. They cleaned nine (9) wells that had no measurable gas flow. Copperhead Customs Inc. cleaned these wells to full production status. The also videoed and cleaned approximately 1,000 feet of landfill gas collection laterals. The CCIA was very pleased with the professional service Copperhead Customs Inc. provided to the CCIA. Prior to using Copperhead Customs the CCIA struggled to find a vendor who could provide the experience that they bring to the table. Most vacuum truck cleaning vendors do not have the complete package of specialized nozzles and the amount of vacuum head that their equipment can produce. It is my belief that you organization will be hard pressed to find a vendor that could provide the level of cleaning and service you need on your landfill gas system.

If you have any questions regarding Copperhead Customs Inc. and the outstanding work they recently completed for the CCIA, give me a call at (609) 381-4904

Sincerely,

James B. Rocco
