Waste Management Inc

To whom it may concern

I have used Copperhead Custom, Inc for the last three years to help rejuvenate gas wells at the Tullytown and Grows facility. Wells that were accessible have experienced exceptional results with either greater amount gas or quality of gas. They were able to provide us gas in non-producing wells. The method and technique Copperhead Custom, Inc uses remains exclusive to this company as far as I know. The method used does not allow any liquid to come in contact with the ground which is perfect for all sites. This system does not flood the wells in which silt is pushed back into the landfill. Instead this system has pulled loose silt from the gas wells and also anything else that was blocking the slots. The exact amount of wells cleaned by Copperhead Custom, Inc is hard to determine due to this site was used as a testing ground for the engineering of this new product. I can say we have benefitted greatly from this procedure. Copperhead Custom, Inc is always a pleasure to work with. They are professional and continuously go over and above what is expected. They are always willing to step outside the box with new ideas and create new tooling for our particular needs.

Thank You,
David R. Watts
